**RE: NOVEL DIGITAL CARBON REWARDS PLATFORM**

Dear Sirs and Madams:

The Arab African for Integration and Development Council has conducted an extensive review of the Earth Exchange, its simplified carbon rewards model, and how the governance and accountability structure interact with the Mother Earth Foundation and have positively concluded that this novel platform and structure is in line with The United Nations' several key goals related to climate change, primarily outlined in the Sustainable Development Goals (SDGs) and the Paris Agreement. These goals aim to address climate change through mitigation, adaptation, and promoting global cooperation.

Sustainable Development Goal 13 (SDG 13) – Climate Action calls for urgent action to combat climate change and its impacts. The key targets are:

- Strengthening resilience and adaptive capacity to climate-related hazards and natural disasters
- Integrating climate change measures into national policies, strategies, and planning.
- Improving education, awareness, and human and institutional capacity on climate change mitigation, adaptation, impact reduction, and early warning.
- Mobilizing financial resources to support developing countries in tackling climate change.
- Promoting mechanisms for raising capacities for effective climate change-related planning and management in least developed countries and small island states.

After close review of these technical materials, we at the Arab African for Integration and Development Council, are recommending that all 54 member countries, which are elected by the UN General Assembly, believe to achieve tangible success in UNSDG goals & 2030 Agenda, it requires partnerships between governments, the private sector, and the civil society.

Please join us in embracing and endorsing new technological advancements to combat climate change, like the Earth Exchange and the Mother Earth Foundation by leveraging the latest Web3 technology which engages all the sections of civil society to save mother nature by creating a winning strategy for each stakeholder to combat climate change, while rewarding them.

Sincerely,

Her Excellency Dr. Sara Al-Mashjari  
Goodwill Ambassador & Adviser Chairman of International Administration Affairs, Arab African Council for Integration & Development (AACID)- The Special Consultive to the UN ECOSOC
